What is

LINQ

LINQ (Language Integrated Query) is uniform query syntax in C# and VB.NET to retrieve data from different sources and formats.

What is

ASYNC

Short for asynchronous programming, it refers to the occurrence of events independent of the main program flow.

What is

RAZOR

Razor is an ASP.NET markup syntax used to create dynamic web pages with the C# or VB.NET programming languages.

What is

EF

Entity Framework is an object-relational mapper (O/RM) that enables .NET developers to work with a database using .NET objects. It eliminates the need for most of the data-access code that developers usually need to write.
